SUMMARY

Full-stack software engineer with 4+ years of experience specializing in building scalable applications. Proven expertise in architecting microservices, optimizing SQL database queries, and enhancing system performance in high-throughput Agile environments. Passionate about writing clean, maintainable code and building resilient backend architectures.

WORK EXPERIENCE

Software Engineer Feb 2024 - Present

Mi9 Retail Inc. | Toronto, Canada

- Architected an asynchronous job-queuing microservice using **Node.js, BullMQ, and Redis** to offload heavy Excel data processing, eliminating main-thread UI freezing and preventing timeout errors.
- Developed and optimized **RESTful APIs and SQL queries** for high-throughput endpoints, reducing backend response times by 35%.
- Refactored client-side state management using **Redux Toolkit**, eliminating boilerplate code across the codebase and enhancing code maintainability and scalability.
- Engineered reusable **React UI Components** and custom hooks, accelerating feature rollout cycles by 30% across cross-functional engineering teams.
- Architected and deployed a modular backend infrastructure using **Node.js** and **Express.js**, supporting scalability, system resilience, and rapid feature development.

Software Engineer Sep 2020 - Mar 2022

Geekyants Pvt Ltd | Bangalore, India

- Built and deployed scalable **React.js and Node.js** web applications serving thousands of active users, driving a 20% increase in user engagement.
- Optimized complex **SQL queries** and restructured relational database schemas, decreasing database execution latency and reducing server load during peak hours.
- Implemented end-to-end features in full-stack **JavaScript/TypeScript** pipelines while adhering to strict code coverage standards using **Jest**

Software Engineer Intern Jun 2019 - May 2020

eLitmus Evaluation Pvt Ltd | Bangalore, India

- Engineered and launched a multi-vendor gift card platform, resulting in a 70% increase in platform transaction volume and user spending using **Ruby on Rails**
- Developed viral user growth features, including refer-and-earn and reward point loyalty systems, driving a 15% expansion in active user acquisition
- Collaborated with cross-functional engineering teams to build and integrate reliable backend RESTful services

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- **Frontend:** React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Microservices, REST APIs, GraphQL, BullMQ
- **Database and Caching:** SQL (MySQL, MSSQL), NoSQL (MongoDB, DynamoDB), Redis
- **Tools and Testing:** Docker, AWS, Git, GitHub, Jest, Jira, Agile/Scrum

EDUCATION

Application Design and Development (PG Diploma) May 2022 - Dec 2023

Lambton College | Toronto, Canada

B.E. in Computer Science and Engineering Aug 2016 - Jun 2020

Lovely Professional University | Jalandhar, India
